EDUCATION

University of Illinois at Chicago, MS in Computer Science | IL, USA GPA: [4.0/4.0](#) May 2026
National Institute of Technology, Bhopal, B.Tech in Computer Science Eng. | India GPA: [8.39 / 10](#) May 2022

Courses: Network Security | Artificial Intelligence | Machine Learning | Computer Vision | Database Management Systems
| Linux | Data Warehouse & Mining

EXPERIENCE

Deutsche Bank, Senior Analyst (Fullstack Developer) | Onsite (Pune, India) August 2023 - July 2024

- Optimized trade pre-booking KYC checks, accelerating transaction processing from 4 days to under 2 minutes.
- Acted as the primary development liaison between Product and Operations teams, overseeing over 20 system enhancements. Ensured technical feasibility and financial market requirements, leading to a 35% reduction in rework.
- Developed a modernized unified trade finance system, reducing pre-booking processing from 10 days to 5 days for 75% of transactions.
- Spearheaded Java upgrade from version 8 to version 17 for 20+ microservices, incorporating advanced language features such as records, pattern matching, reducing memory usage by 20%.

Deutsche Bank, Graduate Analyst | Onsite (Pune, India) July 2022 - August 2023

- Optimized CI/CD pipelines with Docker, Jenkins, and GCP, cutting deployment time by 70% and boosting operational productivity.
- Fixed a critical issue with asynchronous compliance check handling of Letter of Credit transactions reducing manual reconciliation efforts by 75%.
- Updated authentication mechanism from Web SSO, based on SAML, to CIDP (OAuth2.0 and OIDC).
- Conducted a six-week Python coding camp - 'Girls on the Rise', as part of Deutsche Bank's corporate social responsibility outreach.

Deutsche Bank, Summer Intern | Remote, India May 2021 - July 2021

- Validated the feasibility of integrating the ELK stack into the organizational fintech framework by cutting log query time by 50%.
- Engineered critical fixes related to dependency management, build automation, and plugins with a 40% improvement in build time.

SKILLS

Languages	Python (TensorFlow, OpenCV, Pytorch, Scikit-learn), R, C++, Java, Git, Bash, ReactJS, HTML5, CSS, TypeScript, JavaScript, PHP, XML, IaC (Terraform)
Framework & Tools	Spring Boot, Spring, MySQL, SQL, Oracle, MQ, Kafka, Google Cloud, Docker, Jenkins, ELK Stacks, Android Studio, Agile, Figma, Data Engineering, Excel
Software	Algorithm & Data Structure, Web & Backend technology, System Design, REST APIs, Data Analysis, Data Science, Product Design, UI/UX
Soft Skills	Problem-solving, Detail oriented, Leadership, Organization Skills

PROJECTS

Cloud-based data analytics dashboard August 2023

- Developed a cloud-based ETL pipeline and sales dashboard using GCP, BigQuery, Airflow, and Data Studio; visualized KPIs and integrated predictive sales modeling using scikit-learn.

AuthGuard: Multi-Level Authentication Framework, NIT-B January 2022 - April 2022

- Team lead for the development of an authorization system with face recognition, signature validation, and password protection, providing multifaceted access management using Python and Django.
- Designed the system architecture and implemented signature validation using Structural Similarity Index (SSIM) for precise comparison.

TweetStance: Sentiment-Based Stance Detection, NIT-B January 2021 - April 2021

- Created a Django-based web application to determine the stance of tweets by leveraging Machine Learning for sentiment and sarcasm analysis.
- Optimized the sentiment analysis model and handled the integration of the different models.
- Developed an algorithm for sarcasm detection ensuring seamless integration with other models by thorough unit testing.
